

This brand guidelines document serves as the visual identity manual for the brand. It outlines the core visual elements—logo, color palette, and typeface—and provides rules for their consistent use. Adhering to these guidelines ensures clarity, consistency, and a cohesive brand presence across all communications and materials.

Logo Suite Guide

This section outlines the proper use and scaling of the logo to maintain clarity, consistency, and strong visual impact across all applications.

Logo Design

The logo is the brand's primary visual mark and must be applied across all key communications where full brand recognition is essential—such as the website, packaging, and official materials.

The logo consists of two elements:

- عزوز
- Azouz Coffee

Use the two elements either together or separately, depending on context and application.

Logo Direction & Concept

The logo is rooted in bold Arabic typography inspired by Kufi script, designed for a modern, style-savvy audience while honoring cultural heritage. The word Azouz is constructed into a unified geometric block that conveys balance, minimalism, and strength. Its clean, crafted form highlights precision and attention to detail, reinforcing the brand's premium positioning.

Logo Scale

The logo must never be scaled smaller than the specified minimum sizes to ensure clarity and legibility.

- The wordmark 'igj' may be used alone at a minimum height of 8 mm (print) or 23 px (digital).
- When used together with the second element 'Azouz Coffee', the full logo must be no smaller than 20 mm (print) or 57 px (digital).

Always maintain sufficient clear space around the logo to ensure visibility and avoid crowding with other design elements.

Clear space:

Minimum size:

Logomark

The icon is a simplified expression of the logo and may be used in small-scale applications, such as social media avatars, favicons, or stamps, where the full logo would not be legible.

Clear space:

Minimum size:

Print: 8 mm

Digital: 23 px

Logo Usage

The logo may be applied across both digital and print touchpoints, but it should always maintain balance—remaining clear, legible, and never overpowering surrounding elements.

When placing the logo on backgrounds, ensure there is strong contrast so it remains visible and impactful.

Avoid using the logo on overly busy, textured, or low-contrast surfaces that compromise readability.

Where brand colors are not suitable, the logo may be applied in black or white for maximum clarity.

Color Scheme Guide

The section outlines the brand's primary and secondary color palettes, providing a clear framework for consistent application. Together, these colors build a cohesive and recognizable visual identity across all touchpoints.

Primary Color Palette

The primary color palette is built around a single core brand color, which serves as the foundation of the visual identity. This color should be applied consistently across all key brand materials—including the website, packaging, and social media—to ensure a strong, unified, and instantly recognizable presence.

Primary colors should always take precedence over secondary tones in core brand expressions.

Secondary Color Palette

The secondary color palette complements the primary brand color and introduces supportive tones that add depth, flexibility, and balance across applications. These shades function as text, accents, and neutrals, enhancing layouts, creating hierarchy, and adding variety without overshadowing the primary brand color.

They may be applied in backgrounds, typography, accents, or UI elements, and should always be used sparingly to support clarity and consistency.

Color Usage

The logo should be applied across different background colors to maintain legibility and brand consistency. The logo may be used in the primary brand color, black, or white, depending on the background. Always ensure sufficient contrast and avoid placing the logo on colors or images that reduce visibility or compromise clarity.

Color combination **DO**

Color combination **DON'T**

Typography

The section outlines the brand's single typeface, chosen for its clarity, accessibility, and web-safe reliability. Consistent use of this typeface across all applications ensures a unified and professional visual identity.

Typeface

The brand's official typeface is **Baloo Bhaijaan**—a rounded, contemporary typeface designed to bring warmth, approachability, and personality to both Arabic and Latin scripts. Its playful curves and generous proportions enhance readability while giving the brand a distinctive and welcoming voice.

As a widely supported Google Font, Baloo Bhaijaan ensures accessibility and reliable rendering across platforms. Using a single typeface across Arabic and English maintains a cohesive and recognizable identity that feels both modern and culturally connected.

Hierarchy is established through weights:

- Baloo Bhaijaan Bold > Headings
- Baloo Bhaijaan SemiBold > Sub Headings
- Baloo Bhaijaan Regular > Body text
